

LEDDriving® XENARC® Golf VI headlights

ECE approved

The LEDDriving® XENARC® Golf VI headlights are fully ECE compliant for a replacement of halogen Golf VI headlights. The product bears the ECE test symbol that is mandatory for all approved automotive components. They are approved according to R6, R7, R48, R87 and R98 and may therefore be legally installed and used in Europe. Thus, there is no requirement to register the headlights.

This does not include special requirements of individual countries on top of the standard ECE certification of the product.

Note

The LEDDriving® XENARC® Golf VI headlights were designed according to the European car model of VW. This means that local adaptations of the manufacturers may have an impact on the functionality of the LEDDriving® XENARC® Golf VI headlights.

Best regards
